PROFILE SUMMARY

I am a dedicated B.Tech Computer Science graduate with a solid foundation in programming languages like Java and Python, and expertise in database management with MySQL. I have successfully developed various projects including a Bank Management System and a File Hider system, which showcase my problem-solving skills and technical proficiency. My internships and academic achievements reflect my commitment to excellence and teamwork

EDUCATION

DR. A.P.J. ABDUL KALAM TECHNICAL UNIVERSITY, LUCKNOW
B.Tech in Computer Science (CGPA: 7.44)

2021-2025

SKILLS

- Programming Languages** : Java, Python
- Database** : MySQL , MongoDB
- Web Technologies** : HTML, CSS, JavaScript
- Frameworks** : NodeJS, ReactJS, ExpressJS
- Core Competencies** : Data Structures and Algorithms, Object Oriented Programming, DBMS
- Soft Skills** : Team Work, Project Management, Communication, Leadership, Public Speaking

INTERNSHIPS

Netcamp Solutions – Summer Intern

JULY'24 – AUGUST'24

- Developed a Real-Estate Website with Functionalities like Property Listing, Filtering Options and User contact Features.
- Utilized HTML, CSS, JS, PHP and MySQL for the project.

Celebal Technologies – Summer Intern

May'24 – July'24

- Created a Bank Management System with features like account creation, deposit, withdrawal, fund transfer, and transaction history.
- Leveraged MySQL and Java Programming for system development.

PROJECTS

Bank Management System

- Designed and Implemented a Bank Management System that supports account management, financial transactions, and a detailed history of transactions using Java and MySQL.

News Portal | MERN Stack

- Developed a full-stack content platform featuring Role-Based Access Control (RBAC) for Admin, Editor, and User personas.
- Implemented complex CRUD operations for article management and an editorial workflow system (Draft to Published).
- Created interactive dashboards for statistical analysis and managed editor accounts via a secure Admin panel.

AI-Powered RFP Management System | MERN Stack

- Built a full-stack AI-powered RFP management system using React, Node.js, MongoDB, Ollama, and Nodemailer to automate RFP creation, vendor communication, proposal parsing, and AI-driven vendor scoring.

CERTIFICATIONS

- SQL and Database (Infosys Springboard)
- Core Java (Coding Ninjas)
- SQL Advance (HackerRank)
- Android Development With Java (Netcamp Solutions)

ACADEMIC AND EXTRACURRICULAR ACHIEVEMENTS

- Solved over 100 problems of Data Structures and Algorithms on Leetcode
- 3 Star in SQL and 4 Star in Java on HackerRank.
- Organized Code Fuse a Problem Solving coding event, demonstrating strong leadership, coordination and event management skills.
